APP.

Scan the QR code or find "Smart Life/Tuya Smart" from Google Play/APP Store to get the free application for Android or iOS. Upon installation of APP on your phone, the app will guide you through registering, connecting the hub to the internet.

Network Configuration & Match

Add your hub

1. Connect your smartphone to the WiFi router, open GPS of your smartphone (Only 2.4GHZ Wi-Fi network is supported).
2. Plug hub close to your WiFi router, put sos button and other sensors beside hub.
3. Login APP, tap "Add Device" or "+".

4. Select "Sensors" tap "Alarm(Wi-Fi)"

5. Input your WiFi information, tap "Next"

6. On your hub, press and hold the configuration button until the blue light flashes quickly, then it is ready to be connected.

Tap "Confirm the indicator is blinking"

Tap "Blink Quickly"

Light Ring

What you see	What it means
Blinking cyan	Somebody visit (Doorbell)
Solid green	Armed
Solid cyan	Home armed
Nothing	Disarmed
Blinking red	Alarming
Blinking yellow	Entry delay @ quickly, exit delay @ slowly
Blinking blue	Wi-Fi connection configuration
Blinking purple	Pairing/sniffer mode

Operation

Adjust Volume

In APP tap Settings > Volume level to select the level you want
Change Tune
 In APP tap Settings > Alarm Chimes to select the tune you want
Alarm Duration
 In APP tap Settings > Alarm Duration to select the voice alarm time you want

Tips: Change one of sensors' tune, you just can change the last matched one. You'd better to select your favorite tune before match next one. Or you delete the sensor and match again.

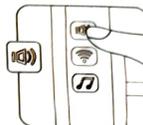

Arm/Disarm

You can arm and disarm your home using the remote tag or APP.

Power Down

To save power and turn the hub off, press and hold the Power Down Button until the light ring change to white and you hear four ticks from strong to weak. Press any button to turn the hub on.

Reset

This process resets your hub to factory settings and removes all pairings. Tap Settings > Factory reset in APP, or press and hold Reset Button until you hear two beeps and light ring change to purple, then the hub restarts.
